

JUGGERNAUT COMMENCES EXPLORATION GEOPHYSICS UNDERWAY ON EMPIRE AND MIDAS

Vancouver, May 15th, 2018 - Juggernaut Exploration Ltd. (TSX-V: JUGR) (Frankfurt: 4JE) (the “Company or “Juggernaut”) is pleased to announce the initiation of its 2018 exploration program with geophysics underway on the Empire and Midas properties in preparation for the inaugural drilling.

The survey results from more than 1,000-line kilometres will be integrated in to the current database and will be used to further delineate the extent of key features associated with mineralization. This data will also assist in focusing the surface exploration and drilling, including: geological mapping, trenching, alteration and whole rock study, soil sampling and prospecting.

Juggernaut is also pleased to report that camp construction within Terrace, British Columbia is nearing completion and will host the technical teams and drilling crews that will conduct the 2018 exploration program on its Empire and Midas properties.

Mr. Dan Stuart, Director, President and CEO of Juggernaut states:

“The company and geologic team are very excited to drill these new bedrock discoveries on Empire and Midas. These mineralized zones are located in world class geologic terranes and have excellent potential of being one drill hole away from a world class discovery. Both the Empire and Midas properties will certainly tick the boxes with the miners, have road access, and are close to excellent infrastructure in Terrace, British Columbia. We look forward to the 2018 season with great anticipation.”

Stefan Kruse, Ph.D., P. Geo., Chief Geologist, is the qualified person as defined by National Instrument 43-101, for Juggernaut Exploration projects, and supervised the preparation of, and has reviewed and approved, the technical information in this release.
